

## Thirty Day Challenge 2009 – Training – Day 03

### 2009TDC03a: Introduction

Running Time: 3mins

### Intro

Wow, day 3!

Well done for sticking with us.

Now, the most important thing I can say to you today is "stay on target" (yes, weak "Star Wars" reference there).

I know that yesterday and today, there can be a couple of terms that are very confusing and you're getting used to Market Samurai. If you keep at it and do a little bit each day, like anything - like working a muscle, or learning anything - it'll get easier and easier every single day. So the most important thing is to stick with it today.

We're doing something really cool today: A lot of the work this week, and in particular today, is all about making sure that you don't go to a whole lot of wasted effort.

That's the great thing about the Internet: If there's one thing I love about the Internet is there's no excuse to take any risks - because all of the information that you need to know - whether you have any chance or an opportunity to get on that front page of Google, thereby getting the traffic the lads have been talking about - you have the ability to check this out.

Thanks to Market Samurai, instead of having to go to 15 different places to find this stuff out, you've got a step-by-step tool that does it all for you, which is just really cool.

Trust me, I'm not going to go off on "remember how I did it in my day", but trust me, it was HARDER! It was harder.

Seriously, Rob Summerville [Guru Bob] had long hair when he started SEO research! For me, Market Samurai came too late, but for Rob, he's just managed to save things.

Where was I? That's right, Day 3.

So, stick with it today - lots of working with market Samurai, and remember, all this effort to find phrases in your Micro-Niche is going to give you the opportunity to get on Page 1 in Google. That's fantastic, isn't it? Because in the old days you would have just had to hope, and you might do all this work, and it would be wasted work.

We don't want that. We've got better things to do, like recording a Grammy-winning album (or not!)

So, stick with us, and head over there [points to lessons on training page], because that is where your training for today awaits.

See you tomorrow.

## Summary:

- Today is about working with Market Samurai
- Work we do today will save us wasting time later
- Stick at it, it will all get easier
