

Thirty Day Challenge 2009 – Training – Day 31

2009TDC31a: Introduction

Running Time: 2min

Intro

Welcome everybody, it's Day 31 - yes, I know it's a thirty day challenge, but Thirty Day Challenge sounds better than Thirty One Day Challenge. Thirty One Day Challenge just doesn't sound quite as good! Anyway, we're here, we're at the end and I'm so thrilled to have everybody behind me here, because the Thirty Day Challenge, bringing it to you takes an extraordinary team effort. From the moderators, to Dan Raine and the crew in Manchester, the Melbourne guys, Rob Somerville, Nez, Caro, the Signet Mae boys for helping out today - just everybody who's just done an extraordinary job to bring Thirty Day Challenge to you - we've got the Market Samurai lads here, we've had incredible co-operation - I hate to think how many people were involved and I just want to say a huge thank you.

Now, where to from here? Well today, what we'd like you to do is have a look at some suggestions that we have for you of where you want to go next and where you can take it next.

30 Day Challenge

there is no charge for awesomeness

We've had an incredible ball today and during the whole Thirty Day Challenge. I just spotted Pete Williams there - I forget, he was looking like Eminem for most of the day, so I forgot Pete was here - sorry Pete! But I want to thank everybody and it's been an extraordinary effort.

The next step is up to you, so we've got a few suggestions, just over there in the training, and we will see you soon. Say ciao everybody [chorus of "ciao everybody" from the crew]!

Summary:

After completion of today's lesson, you will have a greater understanding of **how to move forward and what your options are**, be it continuing to work with the Thirty Day Challenge training materials, joining **Thirty Day Challenge Plus**, or continuing your education elsewhere. **As long as you keep the momentum going.**

Today's Tip:

Take heed of Ed's advice.

You build your business by taking action, creating a routine for yourself and sticking to it. The 30DC gives the best framework you could ask for, and **30DC Plus** builds directly on from that.

Become a master of the process and the success will follow.
